Artificial Economics and Self Organization

Artificial Economics provides a structured approach to model and investigate economic and social systems. In particular, this approach is based on the use of agent-based simulations and further computational techniques. The main aim is to analyze the outcomes at the overall systems level as results from the agents behavior at the micro-level. These emergent characteristics of complex economic

DISCOVERING ARTIFICIAL ECONOMICS

Most of twentieth-century economics has been reductionist in character. Reductionism tries to break down complex economies into simpler parts, like industries and households, and those parts, in turn, into even simpler ones, like jobs and persons.
