Optimal Control of Systems Governed by Time Delayed

In the present paper, we consider an optimal control problem for systems governed by time-delayed, second-order, linear, parabolic partial differential equations with a first boundary condition.

Chapter IX Optimal Control of Systems Governed by Partial

In the control of systems governed by parabolic equations, the chapter focuses on certain control systems governed by parabolic partial differential equations that typically arise in heat conduction or diffusion problems. Boundary control of the heat equation is discussed in which the problem of controlling the temperature in a region when the body is heated by convection on its boundary is considered. For this problem, Newton's law of heating (cooling) is used.

Domain Decomposition Optimal Control of Systems Governed

We present an iterative domain decomposition method for the optimal control of systems governed by linear partial differential equations. The equations can be of elliptic, parabolic, or hyperbolic type. The space region supporting the partial differential equations is decomposed and the original
