Theory | C3.1 Shear Flow | Solid Mechanics II

Shear flow helps us to determine the shear force distribution in each portion of the cross-section, and is necessary to help us work out the shear centre. C3.1 Shear Flow The shear formula in Solid Mechanics I ($\tau = VQ/It$) is useful as it helps us to find the critical max τ , which would help us to design a safe structure that can withstand the max τ .

Shear flow - Wikipedia

The term shear flow is used in solid mechanics as well as in fluid dynamics. The expression shear flow is used to indicate: a shear stress over a distance in a thin-walled structure; the flow induced by a force.
